Chain belt conveyor Bollegraaf, type HBT 600-2000x21,986, yoc 2000, compl. refurbished 2020, dimensions 6,723 / 13,923/ 1,340 / 2,000 / 5,900 mm

The steel construction of the conveyor belt was completely overhauled. Wearing parts such as chains, gears and rubber belt are renewed when the dimensions for the new location have been determined. At the customer's request, the belt can be adapted, shortened or extended.

Technical data conveyor belt

Manufacturer	Bollegraaf
Typ	HBT 600/2000 x 21.986
Year of contruction	2000 (overhauled 2020)
Drive power	7,5 kW
Length infeed conveyor over all	6,723 mm
Length module infeed conveyor	5,500 mm
Height infeed conveyor over all	1,300 mm
Height side wall infeed conveyor	500 mm
Length elevating conveyor over all	13,923 mm
Lenght module elevating conveyor	13,300 mm
Height side wall elevating conveyor	800 mm
Gradient of elevating conveyor	30°
Length gooseneck	1,340 mm
Lenght module gooseneck	1,000 mm
Slope of gooseneck	15°
Height drive shaft over ground	approx. 5.900 mm
Effective width	2,000 mm
Pit dimensions	9.900 x 2.750 x 1.300 mm (l x w x h)

Overhaul work:

· Frame sandblasted, primed and repainted

· Chain guide rails renewed

· Chain will renewed

Chain belt conveyor Bollegraaf, type HBT 600-2000x21,986, yoc 2000, compl. refurbished 2020, dimensions 6,723 / 13,923/ 1,340 / 2,000 / 5,900 mm

· Gears will renewed

· Rubber belt will renewed

· Steel tappets will renewed

Comments:

The steel construction of the conveyor belt was completely overhauled. Wearing parts such as chains, gears, rubber belt and steel tappets are renewed when the dimensions for the new location have been determined. At the customer's request, the belt can be adapted, shortened or extended.

Inspections at our warehouse are possible after agreement. We will not assume liability for the given technical data and possible errors.
