

Paper shredder Bollegraaf, type HBS 110 - 1500, year of construction 1994, drive power 110 kW, throughput 25 tons/hour, with hydraulic fluid coupling

The shredder was used to shred paper, cardboard, newspapers, magazines, books, etc. in order to achieve optimum compaction and dimensional stability of the bales in the downstream baling press. The machine is in good working condition, dismantled stored and ready for loading.

Technical data paper shredder:

Manufacturer Bollegraaf
Type HBS 110 - 1500
Year of manufacture 1994
Drive power 110 kW
Throughput approx. 25 t/hour
Dimensions of feed hopper 1,970 x 2,000 mm
Dimensions of built-up machine 3,160 x 4,400 x 3,980 mm (L x W x H)
Weight approx. 11.5 t

Special features:

The drive unit is equipped with a hydraulic fluid coupling that minimises current peaks during start-up and operation. The rotor is mounted on oversized roller bearings and equipped with replaceable hammers that are extremely wear-resistant.

Range of applications:

The shredder was used to shred paper, cardboard, newspapers, magazines, books, etc. in order to achieve optimum compaction and dimensional stability of the bales in the downstream baling press.

Condition of the shredder:

The shredder is in good working condition and will be dismantled at the end of April.

Scope of delivery:

Shredder with feeding hopper

Paper shredder Bollegraaf, type HBS 110 - 1500, year of construction 1994, drive power 110 kW, throughput 25 tons/hour, with hydraulic fluid coupling

Comments:

The documentation (Manual, electr./hydr.-drawings), are completely available. Inspections are possible after agreement. We will not assume liability for the given technical data and possible errors.
