

Destacking and restacking machine for paper and cardboard

It is a destacking and restacking machine for paper and cardboard.

Technical data for the stacking system:

Manufacturer Schneider Engineering AG

Type Destacking machine 3544

Year of manufacture 1998

Connected load 6.8 kW

Hydraulic oil tank 100 l

Working pressure 100 bar

Table load 300 kg

Machine weight 2300 kg

Type: 3553 restacking machine

Year of manufacture: 1998

Connected load: 6.8 kW

Hydraulic oil tank: 100 l

Working pressure: 100 bar

Table load: 300 kg

Machine weight: 2250 kg

Note:

The system is still assembled and can be viewed while powered up.

Scope of delivery:

A system unit consisting of a destacking and restacking machine with table and conveyor technology.

The lifting table as a feeding machine at the beginning of the system, see red marking, is not included in the scope of delivery.

Destacking and restacking machine for paper and cardboard

Comments:

The documentation (Manual, CE-declaration, electr./hydr.-drawings), are available in German. Inspections are possible after agreement. We will not assume liability for the given technical data and possible errors.
